Guaranteed Accuracy. Real Personal Service.

Get back to business.

Whether your business has two employees or three hundred, they both have one thing in common - the demanding requirements of payroll. In addition to basic payroll processing, just staying up to date with the constantly changing laws and regulations can leave even the most seasoned accounting department questioning their accuracy. This is where a call to Checkmate can alleviate all your concerns. We're a group of payroll professionals and tax experts that offer guidance and solutions for all your payroll needs while providing a level of personalized service that's unmatched by larger payroll companies. So whether you're unhappy with your current payroll company, or just tired of doing payroll yourself, call Checkmate – we take care of all the details, so you can get back to business.

The Checkmate Difference.

Responsive, personalized service is a priority at Checkmate. Unlike the larger payroll processing companies, your business will work exclusively with **one** of our payroll specialists, rather than being a number in a system to be handled by numerous individuals who don't know your business. This personal attention to our clients ensures 100% accuracy and develops a relationship that the big companies just can't match. You have a question? Just pick up the phone and call **your** payroll specialist. No runarounds, no wasted time. Just the answers you're looking for.

We keep it simple.

Our rates include payroll setup, federal tax deposits made via EFTPS, new hire reporting, and preparation of Federal and State Quarterly Payroll Tax Returns. Choose our basic services, or add the "bells and whistles." You design the payroll that meets your needs.

Each payroll is accompanied by laser imprinted paychecks and direct deposit vouchers drawn on your bank account, a cash analysis report which shows the net cost of the payroll, and customized reports are provided at no additional charge to fit your particular needs.

We have a different attitude.

We believe that because payroll is typically the number one operating expense of any business, you deserve better. We take a proactive approach to your payroll needs by offering timely, personalized service delivered with the highest level of quality. We will work with you to identify your specific payroll and reporting requirements, crafting the solutions that will work for you. We watch for "red flags" that cost employers unnecessary money, penalties, and interest. In other words, we offer you peace of mind while helping to save you money.

It just doesn't get any better.

More than just payroll.

In addition to premium payroll services, Checkmate is pleased to offer additional services such as Workers' Compensation, 401(k) Retirement Plans, Flexible Spending Accounts, Employee Reward Programs, Employee Screening, and Section 125 Plans. We've partnered with select organizations to make these valuable products and services available to our clients at considerable savings when packaged with our payroll services. To learn more, please call one of our representatives today.

Switching to Checkmate is easy!

We're completely confident that once you experience the Checkmate difference, you'll wish that you called years ago. Whatever your current payroll situation, switching to Checkmate is simple, fast and more importantly...reliable. We look forward to working with you.
